Script

Scenario: You are a 2nd year General Education student looking for a new community to join and events to participate in. Using this system can you show me how you would do the following tasks:

- 1) Set preferences for Communities
- 2) Locate directory of filtered communities
- 3) join communities
- 4) Search directory of for events
- 5) Change event filter
- 6) Utilize map feature
- 7) Check messages

Note: The following features are tested with the above tasks:

- 1) User Account Creation
- 2) Logging in
- 3) Setting filters
- 4) Locating communities and events
- 5) Event map usage

Scenario: You are a 1st year Computer Science student looking to create a new community to play tabletop games, and would also like to host a welcome event. Using this system can you show me how you would do the following tasks:

- 1) Create a new community
- 2) Set tags for filters
- 3) Create a new event
- 4) Check your community landing page
- 5) Check messages for interested participants

Note: The following features are tested with the above tasks:

- 1) Account Creation
- 2) Logging in
- 3) Creating events
- 4) Checking landing page
- 5) Checking messages

Scenario: You are a physics professor and would like to host a special lecture. Using this system can you show me how you would do the following tasks:

- 1) Create an event
- 2) Check and change event date

Note: The following features are tested with the above tasks:

- 1) Event creation
- 2) Event modification
